Final Feedback from AI

Phonics Assessment by AI: Arshad has demonstrated a strong understanding of phonological concepts in various areas assessed. In the Identification of Uppercase/Lowercase Letters, Arshad correctly identified 1 out of 2 prompts, showing a good grasp but needing improvement with uppercase letters. In terms of Syllable Identification, Arshad accurately identified syllables in both tests, indicating a solid understanding of this aspect of phonological awareness. For Rhyming Words, Arshad displayed excellent skills, correctly identifying all given rhymes, which reflects a strong ability to recognize phonetic patterns. Regarding Pronunciation Accuracy, Arshad's overall score is commendable at 87, with particularly high fluency (99) and integrity (94). However, he faced challenges with certain words, such as 'stars' and 'the,' showcasing areas for improvement. The assessment of individual phonemes revealed inconsistencies, particularly with certain consonant sounds, suggesting the need for targeted practice in consonant clusters (68). To elevate his skills to the next level, it is recommended that Arshad attend the academy 4 days a week for 6 weeks, focusing on targeted phonics and pronunciation exercises to enhance his consonant accuracy and letter identification skills further.

Sound practice focus

Summary: Focus extra practice on: t■, p, ð, z, j, u …

Based on average scores for each speech sound (phoneme) in your recordings, these sounds scored below 75 and deserve targeted practice: t■ (64), p (68), ð (68), z (69), j (70), u (71), æ (71), k (71), …. Try minimal-pair listening, slow repetition, and mirroring a clear model for these sounds.

Pauses in Pronunciation Sentences

Question 1: The stars sparkle in the dark sky, and the moon shines bright like a big light!
Status: No Pauses

Question 2: The planets go around the sun like a big dance in space!
Status: No Pauses

Question 3: The rocket zooms up high into the sky, exploring the universe!
Status: No Pauses

Question 4: The spaceship flies between the stars, looking for fun adventures!
Status: No Pauses

Specific Errors in Pronunciation Questions

Question 1: The stars sparkle in the dark sky, and the moon shines bright like a big light!
Mispronounced Words: stars (5), dark (76), sky, (75), and (73), the (0), shines (79)
Incorrect/Missing Articles: the (0)

Question 2: The planets go around the sun like a big dance in space!
Mispronounced Words: the (73), like (68), dance (74)

Question 3: The rocket zooms up high into the sky, exploring the universe!
Mispronounced Words: the (15), rocket (22), into (69), universe! (70)
Incorrect/Missing Articles: the (15)

Question 4: The spaceship flies between the stars, looking for fun adventures!
Mispronounced Words: spaceship (76), for (70)

Descriptions

Phonics Skills

- Vowel Sounds: How clearly your child says words.
- Fricatives & Affricates: Ability to pronounce sounds like 'f', 'v', 'th', 's', 'z', 'sh', 'ch', and 'j'
- Consonant Clusters: Ability to pronounce groups of consonants together (like 'str', 'spl', 'nt')
- Intrusion & Elision: Inserting or dropping sounds for smoother speech
- Diphthongs: Ability to correctly pronounce gliding vowel sounds (like 'oi', 'ow', 'ai')

Intonation Metrics

- Pitch: How high or low your child's voice sounds.
- Intonation: How smoothly your child's speech flows.
- Volume: How loud your child's voice is.

Grammar

- Grammar: How correctly your child uses grammar.
- Integrity: How well words match what they're supposed to say.
- Word Errors: Number of words pronounced incorrectly.
- Verb Errors: Number of mistakes in verbs.
- Article Errors: Number of mistakes in articles.
