Final Feedback from AI

Phonics Assessment by AI: Arshad demonstrates a strong foundation in phonological skills, particularly in pronunciation accuracy, fluency, and letter-sound recognition. He correctly identified lowercase and uppercase letters in most instances, although he made an error in identifying 'K' as lowercase, which indicates a need for further reinforcement in letter case recognition. His ability to identify syllables is commendable, as he accurately counted the syllables in both 'rainbow' and 'dance.' Arshad is adept at recognizing rhyming words, successfully finding rhymes for 'rat' and 'bat.' In the pronunciation assessments, Arshad's overall scores ranged from 79 to 94, indicating a mix of strong and improving areas. His highest scores were in fluency and integrity, showcasing his ability to read smoothly with high logical coherence. However, areas such as consonant clusters and certain phonemes show room for improvement, particularly the words 'stars,' 'dark,' and 'sky,' where he faced challenges in phoneme accuracy. Arshad's overall proficiency in phonics is promising, but consistent practice focusing on letter recognition, phoneme articulation, and challenging consonant clusters will be beneficial. It is suggested that Arshad attends the academy 3 days a week for the next 6 weeks to further develop his skills and address these specific areas for improvement, which will help him progress to the next level of his phonological development.

Sound practice focus

Summary: Focus extra practice on: t■, p, ð, z, j, u …

Based on average scores for each speech sound (phoneme) in your recordings, these sounds scored below 75 and deserve targeted practice: t■ (64), p (68), ð (68), z (69), j (70), u (71), æ (71), k (71), …. Try minimal-pair listening, slow repetition, and mirroring a clear model for these sounds.

Pauses in Pronunciation Sentences

Question 1: The stars sparkle in the dark sky, and the moon shines bright like a big light!
Status: No Pauses

Question 2: The planets go around the sun like a big dance in space!
Status: No Pauses

Question 3: The rocket zooms up high into the sky, exploring the universe!
Status: No Pauses

Question 4: The spaceship flies between the stars, looking for fun adventures!
Status: No Pauses

Specific Errors in Pronunciation Questions

Question 1: The stars sparkle in the dark sky, and the moon shines bright like a big light!
Mispronounced Words: stars (5), dark (76), sky, (75), and (73), the (0), shines (79)
Incorrect/Missing Articles: the (0)

Question 2: The planets go around the sun like a big dance in space!
Mispronounced Words: the (73), like (68), dance (74)

Question 3: The rocket zooms up high into the sky, exploring the universe!
Mispronounced Words: the (15), rocket (22), into (69), universe! (70)
Incorrect/Missing Articles: the (15)

Question 4: The spaceship flies between the stars, looking for fun adventures!
Mispronounced Words: spaceship (76), for (70)

Descriptions

Phonics Skills

- Vowel Sounds: How clearly your child says words.
- Fricatives & Affricates: Ability to pronounce sounds like 'f', 'v', 'th', 's', 'z', 'sh', 'ch', and 'j'
- Consonant Clusters: Ability to pronounce groups of consonants together (like 'str', 'spl', 'nt')
- Intrusion & Elision: Inserting or dropping sounds for smoother speech
- Diphthongs: Ability to correctly pronounce gliding vowel sounds (like 'oi', 'ow', 'ai')

Intonation Metrics

- Pitch: How high or low your child's voice sounds.
- Intonation: How smoothly your child's speech flows.
- Volume: How loud your child's voice is.

Grammar

- Grammar: How correctly your child uses grammar.
- Integrity: How well words match what they're supposed to say.
- Word Errors: Number of words pronounced incorrectly.
- Verb Errors: Number of mistakes in verbs.
- Article Errors: Number of mistakes in articles.
